a Call counts, 44 of 69 strains equal
(0.64, 0.52 to 0.74); unit: strain
strains
calls on the short-read assembly
minus calls on the long-read assembly
b Where each long-read centromere is
n = 1103 centromeres in 69 strains; interval over strains
intact, called
intact, not called
split
N run
absent
fraction of long-read centromeres
c CDEII length, 909 of 975 identical
unit: centromere, 69 strains
centromeres (log scale)
CDEII length, short-read call
minus long-read call (bp)
d Breaks: ratio 0.51 (0.35 to 0.66), Holm p 0.0011
n = 69 strains; grey: each strain; blue: pooled
fraction broken in the short-read assembly
0.223
0.114
